PROFILE

I am, Nurhasan, am an undergraduate student in Informatics Engineering at Sultan Agung Islamic University. I am very enthusiastic to continue learning, especially in the field of information technology. As a Bachelor of Information Engineering student, I have knowledge in information technology, software development, and data processing. I have studied various aspects such as programming, databases, data analysis, as well as information security. I also developed practical skills in the use of various programming languages, including C++, Java, Python, JavaScript, and PHP, as well as experience in software development. I am ready to continue learning and contributing in a dynamic team with a focus on innovative and effective solutions.

EDUCATION
